LEGAL PROVISIONS FOR FOREIGN ARCHITECTS

In Sweden the title "architect" is not protected, nor is the profession. Anyone can apply for a building permit. The client is responsible for the building and has to choose a "responsible supervisor", who must be accepted by the local authorities. There are no legal restrictions to foreign architects exercising their profession in Sweden nor having their projects implemented. It is however common that foreign architects in this situation collaborate with a Swedish architect, for practical reasons.

In European, the team leader must be an architect. For the Swedish competition sites, this is defined as someone who has a university degree in architecture or is adopted as an architect in a professional architectural organisation affiliated to UIA or ACE. The team leader must be able to show documents to support this on request.

Also see point the competition rules.
