

The town of Aulnat is characterised by its central position in the history of the territorial and urban development of the Limagne plain...

Our response to a central problematic, the visual globe of the project is centred on the massive introduction of vegetation...

The town of Aulnat is characterised by its central position in the history of the territorial and urban development of the Limagne plain...

In order to respond to this problem, the overall vision of the project is centred on the massive introduction of vegetation...

METAMORPHOSIS The airport of Clermont-Ferrand-Auvergne, premier airport 100% EnR. Clermont-Ferrand-Auvergne Airport, the first 100% renewable energy airport...

Les villes sont à l'image de la distinction que l'humain aime à établir entre lui et son environnement : le paysage urbain tel que nous l'avons imaginé jusqu'à présent s'étendait sur des plaines...

Les vastes zones arborées à travers le monde et à travers les âges ont largement contribué à la destruction de zones naturelles et de biodiversité...

Metamorphosis is something that all living things go through. It is the elementary and original experience of life, the one that defines its strengths and limits...

Cities reflect the distinction that humans like to make between themselves and their environment: the urban landscape as we have imagined it up to now spreads over the fields and leaves the wild fauna out...

The vast forest areas throughout the world and throughout the ages have largely contributed to the destruction of natural areas and biodiversity...

CARDO La plaine fertile et le lien avec le territoire rural. The fertile plain and the link with the rural territory.

The project is a poor object of intensification of the lien airport-village-nature et de recréer un environnement de plaine fertile linéaire sur un axe de Nord au Sud...

The project aims to intensify the airport-city-nature link and to recreate a linear fertile plain environment on a north-south axis, recreating a link between the airport site and Aulnat...

01. Les parterres linéaires - Linear terraces. 02. Les zones d'irrigation de la Limagne et le passage du toit végétal - The irrigation channels of the Limagne and the presence of the vegetation...

Pour s'adapter au changement climatique, le ville de demain doit changer sa relation au monde vivant. En effet, à mesure que le climat se transforme, les espèces changent les lieux...

Pour s'adapter au changement climatique, le ville de demain doit changer sa relation au monde vivant. En effet, à mesure que le climat se transforme, les espèces changent les lieux...

01. Les parterres linéaires - Linear terraces. 02. Les zones d'irrigation de la Limagne et le passage du toit végétal - The irrigation channels of the Limagne and the presence of the vegetation...

03. L'occupation urbaine du site par les végétaux et la fonction productive - The evaluation of the site by plants and the production function.

04. Les parterres hydrologiques et filtrants du territoire écosystémique - The water and forest functions of the Clermont-Ferrand area...

05. Plan Massé - Massé plan 1/10000. The project aims to intensify the airport-city-nature link and to recreate a linear fertile plain environment on a north-south axis...

06. Aménagement général - General Aménagement. The project aims to intensify the airport-city-nature link and to recreate a linear fertile plain environment on a north-south axis...

07. Plan Massé - Massé plan 1/10000. The project aims to intensify the airport-city-nature link and to recreate a linear fertile plain environment on a north-south axis...

08. Aménagement général - General Aménagement. The project aims to intensify the airport-city-nature link and to recreate a linear fertile plain environment on a north-south axis...

09. Aménagement général - General Aménagement. The project aims to intensify the airport-city-nature link and to recreate a linear fertile plain environment on a north-south axis...
