LEGAL PROVISIONS FOR FOREIGN ARCHITECTS

In Hungary a Professional License is required for persons intending to perform engineering/designing activities subject to a permit, and a special expert's license is required before an expert opinion, or advice can be given.

The criteria of obtaining entitlement are as follows:

- Membership of the Hungarian Chamber of Architects with paid membership fee
- "Professional License" issued (on application) by the Chamber and on the basis thereof entry into the Chamber's official "Register of Designers and Experts"

Granting membership to and establishing entitlement of non-Hungarian citizen engineers is administered by the Chamber under a single procedure. Entitlement-establishment in Hungary of citizens of the European Economic Region (EER = the European Union and Norway, Iceland, Lichtenstein) is administered in part by the Chamber, in part by the competent ministry. The Chamber, acting on behalf of the applicant EEA-citizen engineer submits – on the basis of his/her documents presented to the Chamber - the application to the ministry and, relying on the resolution passed by the ministry, decide on the entitlement.

The engineer is obliged to ensure the use of Hungarian language in all his services offered, consultations performed, further in all reports and documents intended for use in Hungary.
