NATIONAL SECRETARIAT
Iris Kaltenegger, Secretary
Dorothee Huber, Secretary Assistant

MEMBERSHIP OF THE NATIONAL COMMITTEE
The association of Europan Österreich is responsible for the competition organised in Austria. The board of the association forms the national committee.

President Bernd Vlay, Architect and Urbanist
Vice-President Alexandra Wuerz-Stalder, Architect
Treasurer Claudia Nutz, Spatial Planner, Executive Consultant
Members Aglaée Degros, Head of Institute of Urbanism at the University of Technology of Graz
Andreas Tropper, Building director of the province of Styria
Bertram Werle, Director of urban planning, City of Graz
Bart Lootsma, Head of the Institute for Architectural Theory, History and Heritage Preservation at the University of Innsbruck
Iris Kaltenegger, Architect

Member of the European Scientific Committee
Aglaée Degros, Head of Institute of Urbanism at University of Technology of Graz
Bernd Vlay, Architect and Urbanist

SITES AND PRIZES AVAILABLE
5 sites: Innsbruck, Graz, Villach, Weiz, Wien
10 prizes: 5 winners and 5 runners-up / special mentions
PUBLICITY FOR THE EUROPA 15 COMPETITION
Advertisements about Europan 15 in leading magazines on architecture: Architektur Aktuell, Bauforum, Wettbewerbe
Up-to-date information and publication of winning teams on www.europan.at.
Opening event in Vienna: Friday 22.03.2019 at AzW (Architekturzentrum Wien)

LEGAL PROVISIONS FOR FOREIGN ARCHITECTS
In Austria architects are entitled to draw up plans and design projects if they are graduates of universities where these disciplines are taught. But as well they must have passed a state examination and have proof of three-years-experience working in an architect's office or in an appropriate professional field. Under these conditions, the federal ministry of economic affairs awards the title "architect", which is indispensable to be registered in the chamber of architects and civil engineers. The title "architect" is, however only given to EU-citizens.
In Austria European Union regulations are valid. According to these rules professionals who are qualified in their own country being member of EU, EWR and Switzerland, can practice their profession in Austria. For architects of these countries two possibilities are at hand: either the architect offers a cross-border service, or the architect is free to settle in Austria in order to exert his/her profession. In both cases, the architect is authorized to draw up plans in accordance with Austrian regulations. The division of skills and the extent of responsibilities is a matter of choice and can be appropriate to each individual case and as a function of the project. Several exemplary projects have been implemented without any major problems. If the architect is not a member of the aforementioned countries, he/she has to enter in collaboration with an architect who is member of one of these countries.

PUBLICATIONS FOR THE EUROPA COMPETITIONS
National catalogue of the results is published in English language, edited by Europan Österreich. The results are announced on www.europan.at.
In addition, the results of Europan 15 will be published in important newspapers and leading magazines on architecture.

IMPLEMENTATIONS

Europan 1
1- Graz: The Mardi group, Winner. 28 dwellings for the Neue Heimat.
2- Graz: Christoph Zechner & Martin Zechner, Winner. 19 dwellings for Gemeinnützige Grazer Wohnungsgenossenschaft, Neufeldweg.
3- Graz: Harald Roser & Sabine Gall, Winner. 23 dwellings for the town.

Europan 2
1- Graz: Peter Pretterhofer & Sonja Simbeni, Winner. 40 dwellings for the town
2- Wien: Martin Feiersinger, Winner. 70 dwellings and services for the town

Europan 4
1- **Klagenfurt**: Hans Huber, Winner. 178 dwellings on the ATW site, finished 2002

2- **Innsbruck**: Frötscher Lichtenwagner, Winner. 105 dwellings, multifunctional hall, rooms for associations, kindergarten, day care centre. In September 2001 the architects finished a study on the Europan-site, after which the implementation process was started. In summer 2006 the construction was finished, and the project opened to the public.

**Europan 5**

**Graz**: Dietger Wissounig, Winner. New proposal for a site close to the competition site for the “OEWG”, a non-profit housing organisation. Implementation was proceeding well until 2003. In 2006 the province of Styria strongly supported the project in order to relaunch implementation.

**Europan 6**

**Wien**: PPAG, Winner. The architects already have finished a study commissioned by the developer in November 2001. The city wanted to support a favourite implementation-climate, though a discussion about mixed use and the integration of the neighbouring sites in the project have delayed the development. Successfully implemented and opened to public finally in 2013.

**Europan 7**

1- **Wien**: PLAYSTUDIO (Vicente Iborra Pallarés & Iván Capdevila Castellanos) & YES STUDIO (Javier Lorenzo Yáñez Molina), Winner. Thirteen years of work performed by the Spanish offices PLAYstudio + YES studio, in collaboration with the local partner Mischek ZT, and the social housing developer ÖSW, finished in a project of 115 units, including patio housing, towers, commercial areas, workshops, playgrounds and a park. Successfully implemented and opened to public finally in 2016.

2- **Graz**: OFFSEA (Office for Socially Engaged Architecture - Andrea Benze & Anuschka Kutz), Winner. In cooperation with the university of applied sciences the winners implemented the concepts of the project as a design studio. Players from other disciplines have been involved in this strategic anchoring of the project on a local level. An exhibition and symposium were held in June 2005 to create a lobby for implementing the project. The goal was to occupy a niche on the market of prefabricated housing dealing with wood as a construction material. A partner from part of the industry was not found which stopped the procedure.

3- **Krems**: Florian Sammer & Karoline Streeruwitz, Winner + SMAQ, Sabine Müller & Andreas Quednau, Runner-up. Both winning teams have been involved in a long-term implementation concept launched by the city. On the urban level the teams participated in the huge development area of “Krems-Ost”, which was guided by a local spatial planning office. On the architectural level the winner team cooperated with a developer; they adapted the competition project in order to meet the regulations for housing subsidies. After a change in Lower Austria’s competition rules another competition had to be held on the Europan site. The Europan winners were invited but did not win.

4- **Salzburg**: touzimsky herold architects, Winner. As the project’s program (senior citizen home) was based on a broad political commitment, there was pressure on a successful implementation. The winners adapted the project concerning the general housing program. In 2004 the result was presented to the public. In 2006, after long negotiations between site owner, developer and city-officials the site got sold to the developer. The architects had to adapt the project to new conditions concerning the uses.
In the beginnings of 2007, the developer found a partner for the implementation of the senior citizen home. Successfully implemented and opened to public in 2012.

**Europan 8**

1- **Amstetten**: José Martín & Maria Belén Serrats, Winner. The architects had been commissioned with a master scenario in cooperation with the Viennese architect Walter Stelzhammer. The result of the master scenario was further implemented in the zoning plan, which determined the guidelines for a step-by-step architectural implementation. Architectural competitions followed the masterplan – the winning team – unfortunately not the Europan team – implemented the first phase of the housing project.

2- **Wien**: Malarchitecture (Mirza Mujezinovic), Winner. The site owner has commissioned a study in order to adapt the competition project to local building guidelines. The study was finished in summer 2006. Since the second half of 2006 the site owner had been looking for clients for the commercial and public uses on ground floor. In 2008 a developer was found in order to implement the project in cooperation with the Europan winner. A workshop exploited the potential of the project in the framework of subsidized housing regulations in Vienna. In collaboration with Atelier 4 as local partner architect, the implementation of about 240 housing units is under progression. In May 2015, the construction work started. The successful completion and the launching ceremony on the roof top swimming deck happened in June 2017.

**Europan 9**

1- **Graz**: Martin Frühwirth & Sonja Frühwirth, Winner. The GBG (Real Estate Agency of Graz) commissioned the team with a study in order to clarify issues of profitability, traffic infrastructure and phasing. Different reasons stopped the implementation.

2- **Kapfenberg**: Enrique Arenas Laorga & Luis Basabe Montalvo, Winner. A workshop with two housing developers was organized, discussing also the unforeseen problems of high-water zoning which was imposed on parts of the site during the competition phase. Therefore, the city and the province tried to find a model for how to deal with the high-water issue, which forbids the implementation of subsidized housing projects. Due to different reasons the implementation stopped.

3- **Linz**: Kuwatsch, Ebinger, Föllmi & Steinacker, Runner-up + Jungfer & Kling, Runner-up + Tato & Vallejo, Runner-up. A workshop with all teams did not lead to a choice of one winner. Preparation of elections and a political discussion on skyscrapers temporarily interrupted the process. In the beginning of 2009, the city announced to continue the procedure, after the election’s result. For the city various scenarios were possible: -A- a further competition among the 3 teams; -B- a combination of the projects on different parts of the large site; -C- a commission for other areas of the town. Different reasons stopped the implementation.

4- **Wien**: Studio UEK (Benni Eder, Theresa Krenn & Katharina Urbanek), Winner. Almost immediately after the competition, the team started an implementation process for housing on the competition site in partnership with GESIBA, using the guidelines of the Europan project as a brief. Studio UEK defined the urban plan for the whole site, then designed the architectural project and built 171 housing units from the 319 planned. Two other architectural teams designed and built the other 148 units on the base of the global plan designed by Studio UEK. Successfully implemented and opened to public in 2013. Publication of the European monograph #28: “Together – An urban strategy for a housing project” in 2014. In 2014 presentation of the implementation process at the Inter-
In 2015 the project had been honoured with the prize “Hauptpreis zu Anerkennung für Quartiersentwicklung.”

**Europan 10**

1- **Wien**: Arenas Basabe Palacios Arquitectos (Luis Basabe, Enrique Arenas Laorga & Luis Palacios Labrador), Winner. A Collaboration between the local partner architect Masha & Seethaler and the winning team started in 2011. In 2014 the masterplan received the initial approval from the City of Vienna and obtained recognition as an “innovative, democratic and sustainable” neighbourhood. In 2014 the project was honoured by the prestigious Swiss Holcim Foundation as an example of sustainable urbanism. In 2014 presentation of the implementation process at the Europan12-13 Intersessions Forum in Pavia (IT). In 2015 the masterplan named Wildgarten got approved by the City of Vienna. Architectural competitions followed the masterplan. The construction of the quarter was launched with the ground-breaking in November 2017. The first building, a social centre, will be finished at the beginning of 2019. Many other buildings are under construction. Arenas Basabe Palacios Arquitectos were commissioned with an architectural implementation - a housing project with eleven blocks in different sizes, approx. 9,500 m² altogether. The construction will begin at the beginning of 2019. In 2018 the current process and status was presented at the Europan 14-15 Intersessions Forum in Brussels.

2- **Eisenstadt**: Esther Escribano & Miguel Ángel Rosique, Winner; Adrian Untaru, Andrei Serbescu, Bogdan Bradateanu, Irina Bancescu & Sebastian Serban, Runner-up. After a series of internal meetings with Europan, the mayor and the director of urban planning the city invited the winner and the runner-up to present their projects to the public. The projects’ ideas of the comprehensive restructuration of the inner-city core required a strong local lobby. In the course of 2011, the city and the site developer had been looking for partners, different reasons stopped the implementation.

**Europan 11**

1- **Wien**: Impressively Simple (Artur Borejszo, Leena Cho, Jason Hilgefort & Andreas Karavanas), Winner. The team was doing a study about the possibilities of integrating the railway stop in the public space, as well as exploring the densification of the project. Negotiations with the Austrian railway company about alternatives to the standardized train-stop design have been undertaken, but without success. Actually, the project has been frozen over the last years. The process of architectural implementation is still waiting for its start.

2- **Linz**: Gutiérrez De La Fuente Arquitectos (Julio de la Fuente & Natalia Gutiérrez), Runner-up; Manga Studio (Gian Luca Zoli, Marcello Galiotto, Nicola Montini, Alessandra Rampazzo, Marco Montagnini & Francesco Fusaro), Runner-up; Potochnik + Mia 2 (Lorenz Potochnik, Gunar Wilhelm & Sandra Gnigler), Runner-up. The highly complex process of the gradual adaptation of the tobacco factory was in the phase of exploring user-options. The city wanted to extract the development of a part of the factory from a range of possible scenarios in order to involve the 3 runner-up teams in a further procedure, but different reasons stopped the implementation.

3- **Graz**: Studio Gruber (Stefan Gruber), Runner-up; Donaire Arquitectos (Juan Pedro Donaire, Juan Pedro Donaire Barbero & Pablo Baruc García Gómez), Runner-up. In 2014 the city launched a follow-up architectural competition involving the runner-up team of Studio Gruber as participant.
Europan 12

1- Amstetten: Blau Architects (Ramon Bernabe Simo & Tomas Labanc),Winner. The team was commissioned to develop a masterplan for the city. Europan was supportive organiser of the workshops. In November 2014 the masterplan was presented. It is planned to involve the team in future architectural competitions. In 2014, Blau architects presented the implementation process at the Inter-Sessions Forum in Pavia (IT). In 2016, a reconsideration of parts of the masterplan was commissioned, integration the preservation of a historical building (locomotive-depot), as well as adapting certain urban parameters. Actually, the ÖEBB and the city look cooperate in the development of an economically feasible use-scenario, intending to integrate the winning team in the following development-steps on the level of architectural implementation.

2- Graz: Tantscherjenuil (Sebastian Jenull & Sandra Tantscher), Runner-up; AR3DE (Katja Aljaž & Matej Mejak), Runner-up. Both teams were invited for a workshop presentation. Yet, the site owner sold the site without coordinating the deal with the city. For this reason, Europan and the city lost the site-developer and the control about the future architectural process.

3- Wien Kagran: Fdrstudio (Hans Fockety & Miquel Del Rio Sanin), Runner-up; Marco Corazza, Giulia Castelli & Alessandro Mingolo, Runner-up; Lorena Del Rio Gimeno, Runner-up. As recommended by the jury, a workshop with the three runner-up teams, the city of Vienna and the site owner was planned to be organised, but frozen due to a fundamental change of the general development strategy of the city in this area: the city decided to save the area for future production-developments. There is still the option to re-invite one of the teams or all on working on the topic. Nevertheless, it is a different task that would have to be set up in a new way.

4- Wien Siemensäcker: Slla Architects (Miriam Liskova), Winner; Arenas Basabe Palacios Arquitectos (Luis Basabe, Enrique Arenas Laorga & Luis Palacios Labrador), Runner-up. Both winning teams participated in a cooperative planning process. A team of landscape planners, traffic planners, local architects, developers and representatives of public administration of the City of Vienna developed an urban masterplan as a basis for the building regulation planning. After the elaboration of the final planning document the architectural planning phase started in 2017. Actually, the buildings are under construction and expected to be finished in 2019/2020.

Europan 13

1- Bruck/Mur: Kuneoffice (Jose Manuel Lopez Ujaque, Francisco Garcia Triviño & Katerina Psegiannaki), Runner-up. In 2016 Europan Österreich invited the runner-up team Kuneoffice and the four preselected teams to participate in a workshop. Together with the city of Bruck/Mur and the Federal State of Styria the teams discussed the basis for a strategy to start an implementation process in Bruck/Mur.

2- Graz: A-Platz (Mihai Buse & Marton Tövissi), Winner. Together with the local partner office HoG Architechts the team is commissioned by ÖBB Real Estate Development to develop a masterplan for the site. This masterplan was finished in 2017. Due to a change of personnel in the management of the ÖBB Real Estate Development, the upcoming process was slowed down. In order to have a sound decision-making basis a revenue planning, which evaluated several options, was made by the offices Steinberger and HOG Architects and was handed over in October 2018. Since then, the town planning is waiting for the decision of the ÖBB with the compilation of the binding land-use plan and for the further steps of the project.
3- **Linz**: Studio UEK (Benni Eder, Theresa Krenn & Katharina Urbanek), Winner. The team was commissioned by WAG Wohnungsanlagen GesmbH to implement their project in Linz Oed. Studio UEK completed the design phase. The local office ‘Mia2’ took over for the construction phase of the project. The demolition of the former buildings on the site has already started in 2018. The completion of the whole site in Linz Oed is planned to be in 2020.

4- **St Pölten**: 04401 Architects (Francesco Marras, Federico Aru, Adriano Dessi, Philip Grosch, Aurora Perra, Silvia Mocci & Francesca Oggiano), Winner; BLOK city (Nela Kadic & Vera Seriakov), Runner-up. Europan Österreich invited the winner and the runner-up to discuss together with BAI Bauträger Austria Immobilien GmbH a possible strategy for a future process of the projects. The Runner Up team BLOK City was commissioned with the elaboration of the masterplan, which was finished in 2017 and constitutes the basis for the binding land-use plan and the concrete building regulations. The complex implementation-process includes a neighbourhood-integration-program, the establishment of a labour-camp-memorial-concept, and the environmental issue of protecting the existing wood, which covers large parts of the project site. The approval of the legal documents is expected to happen in 2019, providing the base for the next step of architectural implementation.

5- **Wien**: Blaž Babnik Romaniuk, Anna Kravcova & Dušan Stupar, Ljubljana, Winner; Claudiu Silvestru, Diana Silvestru, Shortlisted. The department MD21 – City of Vienna and Europan Österreich organised a start-workshop and invited the winning team and the shortlisted team to discuss the goals and future steps of the coming implementation process. The team of Blaž Babnik Romaniuk was commissioned by the city of Vienna to develop an urban masterplan scenario in collaboration with the local partner-office ‘BEHF’. In order to receive a comprehensive strategy for the whole area and its surroundings, the Europan team convinced the city and the stakeholders to extend the study area for the commissioned masterplan, adding additional sites. Several workshops with all the involved stakeholders followed and the strategic masterplan scenario was finished in 2017. A follow up study for a further site in this development area was commissioned by the site-partner ‘ARE’ and the Wiener Linien at the end of 2017 (finished in May 2018). The implementation of the masterplan as a binding land-use plan with building regulations is currently in progress, providing the framework for the future architectural implementation. Blaž Babnik Romaniuk and BEHF will stay involved as architects in the future developments in Kagran.

**Europan 14**

1- **Graz** StudioD3R (Radostina Radulova-Stahmer & Deniza Horländ), winner. KollektivNordSued (Anna Ilonka Kübler, Christiane Kolb & Leonard Higi), Special Mention. Natalia Vera Vigaray, Patxi Martin & Tijn Van de Wijdeven, Special Mention. The winners were invited to present their project in a workshop setting with the city of Graz and EUROPAN Austria. A strategy for the implementation process was laid out. The winning team Studio D3R will develop a strategic masterplan scenario for the overall site. Additionally, the City of Graz wants to include the two special mention teams for certain phases on specific topics. First steps are planned in Spring 2019.

2- **Linz** Esoes (Cornelia Bräuer, Paloma Montoro Delgado & Airam González Dorta), Runner Up. Sedicigradi Atelier (Andrea Chiarelli, Enrico Ferraresi, Giacomo Magnani, Gabriella Dora Romito), Runner Up. Spaziozero Atelier (Lorenzo Ciccu, Simone Langiu, Carlo Pisano) with RE:Landscape (Elisabetta Sanna and Roberta Serra), Runner-Up.
In January 2018 the ÖBB and the City of Linz invited two runner-up teams - Spaziozero Atelier with RE:Landscape and Sedicigradi Atelier - to participate in a workshop moderated by Europan Austria. Both teams were commissioned by the ÖBB to revise their projects according to the findings of the workshop and develop a masterplan scenario to be used as base for a binding land-use plan. In April 2018 after the presentation of the revised projects, Spaziozero Atelier with RE:Landscape was selected. Currently Europan Austria is negotiating next steps with the City of Linz and the ÖBB.

In January 2018 a start-workshop was organised with the winning team and the Runner-Up to discuss further steps. Subsequently the winning team, the developers and the municipality went on a field trip to Munich in order to see similar projects already implemented. A change in personnel on the developer’s side, slowed down the process flow. Currently the site-partners are looking for potential tenants to start phase1. Talks between all parties are on-going.
