LEGAL PROVISIONS FOR FOREIGN ARCHITECTS

Law No.77-2 of 3 January 1977 on architecture

Article 9

Amended by [Order No. N005-1044 of 26 August 2005 - art. 2 JORF 27 August 2005](#)

Only individuals registered on a regional register of architects in accordance with the provisions of articles 10 and 11 may describe themselves as architects.

Only legal entities registered on a regional register of architects in accordance with the provisions of article 12 below may describe themselves as an architectural firm.

Individuals or legal entities registered on a regional register or the annex of a regional register are entitled to practice anywhere in France.

Article 10

Amended by [Order No. 2008-507 of 30.05.08 - art. 42 5](#)

Individuals of French nationality or who are citizens of a Member State of the European Community or another State that is party to the agreement on the European Economic Area may be registered, at their request, on a regional register of architects, provided that they are in full possession of their civil rights, provide the necessary guarantees of morality and fulfil one of the following conditions.

1° That they either hold a State architecture diploma or another State-recognised French architecture diploma and, in their own name, hold a licence, issued by the State, as a State-qualified architect authorised to practise as a project manager, or that they hold a State-recognised diploma, certificate or other foreign qualification to exercise the profession of architect;

2° That they hold a diploma, certificate or other foreign qualification issued by another State, which has been recognised in a Member State or in another State that is party to the agreement on the European Economic Area and which has enabled them to exercise the profession legally in that State for a minimum period of three years, provided that this professional experience is certified by the State in which it was obtained;

When the minimum period of three years of exercise did not take place in the State that recognised the said diploma, certificate or qualification, the holder must be recognised by the Minister for Culture as qualified with regard to the knowledge and qualifications certified by that diploma, certificate or qualification, and by all the training and professional experience acquired;

3° That they are recognised as qualified by the Minister for Culture, after examination of all the knowledge, qualifications and professional experience pertaining to those required by the existing rules authorising exercise of this profession, when the applicant does not hold the diplomas, certificates or other qualifications listed in annexes V, point 5.7, and VI of directive 2005 - 36 - CE of the European Parliament and of the Council of 7 September 2005 relating to the recognition of professional qualifications.

In the circumstances referred to in paragraphs 2 and 3 above, the Minister for Culture may require the interested party to accomplish countervailing measures in order to register on the register of architects;

4° That they are recognised as qualified by the Minister for Culture on presentation of professional references establishing that the person has particularly distinguished themselves by the quality of their achievements in the field of architecture, as judged by a national committee.

The procedures for application of paragraphs 2, 3 and 4 are set by a Council of State decree.

Article 10- 1

Created by [Order No. N008-507 of 30 May 2008 - art. 42](#)

An architect who is a citizen of a Member State of the European Community or another State that is party to the agreement on the European Economic Area, who is legally established in one of those States, may exercise the profession of architect in France in a temporary and occasional manner, without being registered on a regional register of architects.

In providing services, an architect is bound by the rules and procedures governing the conditions of exercise of the profession, the use of the professional title, the professional regulations or ethical and disciplinary rules applicable to the profession, and the insurance requirements corresponding to the intended services.

In order to provide such services, a prior written declaration must be made to the regional council of the register of architects at the time of the first service provision. This declaration must be repeated once a year if the service provider plans to exercise his professional activity occasionally in the course of the year in question or in the event of a material change in his situation. It should notably be accompanied by information on insurance cover and other means of personal or collective protection.

If the service provider's qualifications are not automatically recognised, the regional council of the order of architects shall verify the declared professional qualifications. Following this verification, and in the event of substantial differences between the service provider's professional qualifications and the training required in France, the regional council of the order of architects shall ask the service provider to undertake a skills test in order to demonstrate that he has acquired the required knowledge and skills, in front of a commission sitting at the National Council of the Order of Architects, the membership of which is set by decree.

A Council of State decree lays down the conditions for the application of this article.

Article 11

Created by law [77-2 1977-01-03 JORF of 4 January 1977 correction JORF 5 and 21 January 1977](#)

Individuals who are citizens of non-member States of the European Economic Community may be registered, on request, on a regional register under the same conditions in respect of diplomas, certificates and architectural qualifications, of entitlement to civil rights and of morality, as French people, subject to the existence of relevant reciprocity agreements or international undertakings.

If this latter condition is not fulfilled, they may nevertheless be authorised to exercise the profession of architecture, under a procedure set by decree.

The same decree specifies the conditions in which a foreign architect may, without being registered on a regional register, be permitted to carry out a specific project in France.

It is essential that all candidates, whether citizens of member states of the European Community or of a non-member State, should refer to the article above and to the following decree and ministerial order.

Decree No. 2009-1490 of 2 December 2009 on the recognition of professional qualifications for the exercise of the profession of architect.

Ministerial Order of 17 December 2009 on the procedures for the recognition of professional qualifications for the exercise of the profession of architect (texts at <http://www.legifrance.gouv.fr>)

The architect may practise as an individual in a freelance capacity or as a member of an architecture firm (article 14 of the above law)

PUBLICATIONS FOR THE EUROPEAN COMPETITIONS

Results

European France publishes and disseminates the results and analyses of each session and contributes to the debates, both nationally and internationally, through various written contributions.

Series of publications - catalogues of results in France, themed texts, etc. - have been published (papers or websites) and can be obtained on request from the French secretariat.

All the publications are available online at the following address www.europan-france.org

Several exhibitions have been presented since the beginning of the competition in France. Among them, European France presented an exhibition dedicated to 5 implementation processes, which was created for the first time, at the ENSA Normandie in Rouen in November 2015. It was also presented in Bordeaux during the E13 results exhibition. This work is meant to be completed and presented in future European events. European algos hosted the event celebrating the 30 years anniversary of the competition on December 13th, 14th and 15th, 2018. A 50 minutes long movie, entitled “En devenir”, a book written by Alain Maugard et Chris Younès, and a two days forum were organised to analyse and study the basis of the competition, and to re-invent them for the next 30 years to come. www.european30ans.org

IMPLEMENTATIONS

Follow-ups of the competition start with European France after the announcement of the results. Often the site or project expert is commissioned to assist the city and the rewarded teams in the process of giving them a mission after the results' announcement. Beforehand, following the announcement of the results, European France organizes an official presentation and exchange between the different stakeholders and the rewarded teams (Rencontres Villes & Equipes), which begins the work in situ, and leading the cities to work with them afterwards. The PUCA finances some processes of European follow-ups.

European 14

- 1- **Pantin**: Urban design study on the area of Portes de l'Ourcq commissioned to each of the 3 rewarded teams for the end of 2018. CLIENT: City of Pantin and EPFIF.
- 2- **Besançon**: After two days of workshop with the 3 rewarded teams, along with the different stakeholders of the site, entitled “Ateliers Urbains Grand Besançon” (paid mission), a consultation was organized. Altitude---35, involved in a project, wone the mission for an urban design and program study on the Campus Bouloie-Temis in Besançon. Set for June 2019.
- 3- **Guebwiller**: after a two-days workshop with the 3 rewarded teams and the stakeholders, technical specifications have been to put into study for the attribution of a market on the urban design to one of the 3 teams. CLIENT: City of Guebwiller, NSC partenaire.
- 4- **Amiens**: after a two-days workshop with the 3 rewarded teams and the stakeholders, technical specifications have been put into study for the attribution of various of markets on the urban design to one of the 3 teams, on different issues than the ones inside the study area. CLIENT: Amiens Métropole. *The process is explained in the movie « en Devenir » made for European 30 years anniversary, in 2018.*
- 5- **Ris-Orangis et Grigny**: ongoing preparations for the follow-ups in 2019.
- 6- **Toulouse Métropole**: after a two-days workshop with the 3 rewarded teams and the stakeholders, technical specifications have been put into study for the attribution of various of markets on the urban design to the group composed of the three teams (similar to Goussainville implementation processes), end of 2019. CLIENT: Toulouse métropole.
- 7- **Lille**: the teams have been invited in situ, the competition follow-ups are being organized for 2019. CLIENT: City of Lille and MEL.
- 8- **Evreux**: the teams have been invited in situ by the Mayor, the competition follow-ups are being organized for 2019. CLIENT: ca Porte de Normandie.
